## Ditch light flasher

By Dc Custom Electronics

Basic wiring guide

Specifications:

| Parameter           | Condition | Min  | Max  | Unit |
|---------------------|-----------|------|------|------|
|                     | Idle      | 0.01 | 0.05 | А    |
| Current draw        | Max load  |      | 10   | А    |
| Voltage input       |           | 7.5  | 30   | VDC  |
| Output (total)      |           |      | 10   | А    |
| Output (individual) |           |      | 5    | А    |

Wiring:

\*\* Note: Trigger is Sink only. This means to trigger, the input must be connected to 0V or "ground" To wire this with a horn see Figure 2
